

# INDEPENDENTS

BY SODEXO

## OUR FIGHT AGAINST FOOD WASTE

A third of all food produced globally ends being wasted, making food waste one of the greatest contributors to climate change and biggest challenge of our time.

Whether it's during the ordering, storage, preparation, or serving process, we are working together with our teams, clients and suppliers to reduce food and collateral waste across Sodexo sites.

## CUTTING OUR FOOD WASTE 50% BY 2025

Our commitment at Sodexo is to halve our own food waste by 2025, a key element of our road map to Net Zero. But with the United Nations stating that one-third of the world's food goes to waste, we are determined to also work towards supporting measures which will further cut food waste outside our own operations.

BRINGING PEOPLE TOGETHER THROUGH FOOD
